

малко магазинче

[malko magazinche]

construction manual malko magazinche [1]

The red tape [2] marks the limits of the shop. Insert the curtain rail [3a] into the bottom of the sunshade [4] and screw both parts together. Fill the bottom of the sunshade with water. Bolt the wall holder [3b] with a screw [5] to the curtain rail. Now you can fit the handle of the fishing net [6] over the wall holder and screw the two together as well. Adjust the wing mirror [7] so it sits at eye level and attach the extension [8].

Adjust the towel rail [9] to be 1.5 meters off the ground and the metal bracket [10] at the top of the curtain rail [3a]. Cut the second curtain rail [11] into 4 equal pieces. Thread the shower curtain [12] and the rings [13] onto the curtain rail [11]. Arrange the four curtain rail pieces and the corner pieces [14] to form a rectangle. Join two of the S-hooks [15] and place them together in the center of the rectangle.

Attach each of the other 4 hooks to the corners. Take the rope [16] and tie 2 corner hooks and 1 center hook together at a time. Hang up the curtain construction by opening the center hooks and attaching them to the end of the metal bracket. Place the decoration piece [17] at the top and place the car mats [18] on the floor. Hang the lamp [19] on the malko magazinche. Arrange the cloth you want to sell on the towel rail [9] and start selling!
